The two memorials shown on this page are of pleasing simplicity and dignity, combining grace and massive proportions. Their distinctive beauty will stand out to an advantage in any surroundings, whether used as a double monument, a single monument or family lot marker. The thought of perpetuating the memory of two persons on a single large monument is a very beautiful one, because it tends to connect these lives, even in death as they were in life. More and more monuments for double graves are being used as years go by. These two monuments are built of our fine old Southern natural quarried Georgia marble. We unhesitatingly recommend these double designs to one and all and fully guarantee both our workmanship and marble to be entirely satisfactory.

The thought that those who here sleep side by side are forever united in rest as once they were united in life's joys and sorrows, is fittingly perpetuated by the broad low type double granite stone like the Johnson design shown here. This neat conservative design is not loud or guady but at the same time has enough carving in the graceful palm leaf to prevent it from looking too severe. When furnished in either of our Guaranteed Georgia Granites this monument will prove satisfactory and last indefinitely. Face of die polished, carved and lettered. Top of base fine sanded finish with balance of die and base rocked finish.

Our monuments are not only better-built they are **honor-built**. We pride above all else our established reputation with the general buying public for honest, fair and square dealings. We realize that this prized reputation is involved in every sale we make. That's why we build all monuments **so good**, from the smallest to the largest.

You spend less and save most when you buy your **monument** from the American **Memorial** Company. Our monuments are as dependable and reliable as the firm itself which has been in business for more than a decade.

Modernism and true worthiness is to be found in the Owen design shown here. We highly recommend it to everyone because past experience has proven it one of the most popular designs ever offered the buying public. The holes at each end of base are drilled clear through so that growing dwarf shrubs can be rooted in the ground and grow up at each end. These shrubs require no attention and always afford nice evergreen foliage whether you visit your cemetery often or not. Face of die is beautifully polished, carved and lettered. Top of base is sanded finish with balance of die and base rocked finish. When built of either of our Gray or Elberton Blue Georgia guaranteed durable granites at our exceptionally low present day prices, this monument design is a bargain you cannot afford to overlook. Order now and be pleased with same the remainder of your life.
